Among the ornaments for the table were an elaborate exception of the Bostoo State Hone, Bunkier Hill Moamment, a beautiful Temple of Cupids, baskets of fiveers and other elegant devices. A large petition was presented the other day to the Michigan Legislature from citizens residing in that inolated region, asking to be separated from the rest of the State and restored to a territorial government, so that a new State might oventually be erected, to comprise the mineral country south of Lake Superior. The institue and recorder of a Superior. The justice and propriety of prayer of the petitioners can not be gain-d. A compliance with it would result in formation of a new free State to counternee, in part, the future subdivision of Tex-

The geography of the territory makes such a vision wholly proper and records. The geography of the territory makes such a division wholly proper and necessary; the wants and interests of the residents demand it, and sooner or later the separation must, from natural and commercial canses, take place. Southern Michigan derives not a particle more advantage from the mineral region now, than she would if it were politically detached. We need tot argue this point, because it is self-evident. The country itself, would develop and populate much faster if it were a State Sovereigsty, instead of being a far distant were reignty-instead of being a far distant province, separated half the year from all inter tourse with the lower peninsula. On grounds of justice and equity the territory should be letached from the State of Michigan, and positically it is the duty of the Republicans of that State to great the state of that upper country, as it would add another Pree State to the Union, and strengthen the hands of Freedom in the United States Senate.

The resolution authorizing the printing of 20,000 copies of the Governor's Message being under discussion, Mr. A anoth rose and said : under discussion, Mr. Annold rose and the Mr. Sprange. Whatever time is spent in this debate, the gentiemen who commenced it are responsible for. When the Message of the late Governor was read, and a motion made by one of his political friends, to print 20,000 copies, I seconded the motion, and my friends unasito the gentlemen on the other side, to extended to Gov. Misseel the same courtery we extended to Gov. Misseel the same courtery we extended to Gov. Matteson. They refused, and finstead to Courtesy, have attacked him with a ferceity, violence and animosity, never before witnessed in a deliberative assembly. They assailed not the Message only, but the man, his honor, his truth, his personal character.

I connede the right to discuss his political opinions, and the subjects embraced in the Message. All this is a fair subject of criticina; but when members go beyond these topics, and drag into the debate the private character of Gov. Such theh was view of the authors of this provision, and we on the same day the Hon. R. B. Thus it appears, by the statement of som those who framed these provisions that were sever intended to include sets done on the State. The gentlemen admighbat if words "as the State." had been inserted, construction would be right. We show that true begot construction and the infection of framers, was that the clauses mean exactly same as if these words had been inserted. It is the almost universal construction gives, these sections by lawyers of both parties. These been the construction by some of the able lawyers of st. Lassis, Ohieago, and other pations of the State, including many desinguish and prominent Buchamin men. Sir, I hateard this opinion expressed by one of it ablest lawyers of this House, and one who is the Buchama party. Our period opponents profess, and, I doubt not, feel, a warm sympathy with those portions of the Union where duelling may be regarded as one of their, peculiar institutions. Scarcely any of the prominent Euchanna leaders of the South but has had his "affair of bouor," Will you give this Constitutions such a construction as will exclude them all from office? Suppose, for example, that Mr. Brocks, of South Carollina, that distinguished leader of your party should come to Johnson county where they dismiss echool masters for voting for Freedom and Framont. Such a man might probably be elected from that comey to this House. Surely you will not give such a construction to the Constitution as would deprive you of the huxery of rewarding this knighly slave-holder—this model of Southern chivalry.

Suppose our Constitution had provided that a person guilty of reason, should be incelligated to office, and provided for the punishment of the officiac otherwise also, would it have mean treason a search of the line of the constitution of the punishment of the officiac otherwise also, would it have mean treason a search of the lines of the punishment of the officiac otherwise also, would it have mean treason a search of the lines of the punishment of the officiac of the search of the s
